

## KLINION - NITRILE ULTRA COMFORT GLOVES

### Description

The Klinion Protection examination gloves are intended to be worn on the hand for medical purposes and to help prevent contamination between patient and examiner. This information does not reflect the actual duration of protection in the workspace and the differentiation between mixtures and pure chemicals. The chemical resistance has been assessed under laboratory conditions from samples taken from the palm only (except in cases where the glove is equal to or over 400mm - where the cuff is tested also) and relates only to the chemical tested. It can be different if the chemical is used in a mixture. It is recommended to check that the gloves are suitable for the intended use because the conditions at the workplace may differ from the type test depending on temperature, abrasion and degradation. When used, protective gloves may provide less resistance to the dangerous chemical due to changes in physical properties. Movements, snagging, rubbing, degradation caused by the chemical contact etc. may reduce the actual use time significantly. For corrosive chemicals, degradation can be the most important factor to consider in selection of chemical resistant gloves. This product provides protection against bacteria, fungi and virus. The penetration resistance has been assessed under laboratory conditions and relates only to the tested specimen. The product contains zinc dibutyl dithiocarbamates and should not be used in case of hypersensitivity to these substances. Before usage inspect the gloves for any defect or imperfections. For single use only. Re-use can cause contamination or infection. Dispose according to local procedures and guidelines. Not made with natural rubber latex. Medical device.

### Product information

In compliance with: MDR (EU) 2017/745 Class I & PPE Regulation (EU) 2016/425 Category III

Klinion Nitrile gloves are available in:

- Ultra Comfort (Thin glove in a white or blue color)
- Ultra Save (Better protection than Ultra Comfort)
- Sensitive (Accelerator-free gloves to reduce the risk on allergies)
- Sensitive Ultra Safe (Great protection and accelerator-free)
