

HiGlo

Dry cleaning solvent for use in Multi-Solvent and Hydrocarbon machines

Application

- HiGlo is a dry cleaning solvent, specially developed for use in Multi-Solvent and Hydrocarbon machines.
- It offers an innovative alternative for perchloroethylene.

Properties

- HiGlo is a clear, colourless liquid with neutral smell.
- HiGlo ensures excellent cleaning results, both with lipophilic and hydrophilic soil.
- The cleaned goods have a pleasant, smooth feel and are easy to finish.
- HiGlo keeps whites and colours like new.

Physico-chemical properties

Density (20°C) : 0,786 kg/l
Flash point : min. 62°C
Boiling point : 184 °C
Viscosity (20°C) : 1,09 mPa.s
KB Value : 45
Process time : 50 – 65 min

Composition & Safety

Based on hydrocarbons with boosting agents.

Harmful.

Meets European directives on the classification, packaging and labelling of dangerous chemical substances and preparations.

Waste disposal: treat waste and residue according to the local regulations.

Storage

Store in a cool, well ventilated place.
Keep out of direct sunlight.

Packaging

Can 15 kg
Container 155 kg
